*Rewriting the Middle Ages in the Twentieth Century* Jaume Aurell i Cardona, Julia Pavón, 2005 The second volume of the collection, centred on National Traditions, is focused on eighteen medievalists who have been significant in diverse countries in the development of both medievalism and national identity. Medievalism has been closely united to national traditions since its beginning, and this book contributes to our understanding of this phenomenon. Romantic intellectuals' attraction to the medieval period largely explains the influence of medievalism in the formation of contemporary national identities, as from the 19th century, medievalists have also functioned as intellectuals present in the public debate. In the 20th century, important scholars of the Middle Ages, some of whom are studied in this volume, had already become authentic national chroniclers, consolidators of the identities of the countries to which they felt closely linked both intellectually and emotionally. They actively participated in debates that exceeded strictly academic limits, delving into a wide range of political and cultural issues..

Reading Dante with Images Matthew Collins, 2021-12-16 This volume contains an unprecedented meeting of two major traditions, each of which are forms of careful engagement with Dante's *Commedia*: the *Lectura Dantis*, and the illustrations of this work. The *Lectura Dantis*, initiated by Giovanni Boccaccio in the fourteenth century, consists of a canto by canto study of Dante's poem. The history of *Commedia* illustration has equally deep roots, as illuminated manuscripts of the text were being produced within decades of the work's completion in 1321. While both of these traditions have continued, mostly uninterrupted, for more than six hundred years, they have never been directly brought together. In this volume, Dante scholars take on a single canto of the *Commedia* of their choosing, reading not just the text, but also exploring the illustrations of their selected text to form multifaceted and multi-layered visual-textual readings. In addition to enlivening the *Lectura Dantis*, and confronting the illustrated tradition of the poem in a new fashion, these studies present a variety of approaches to studying not just the *Commedia* but any illustrated literary work through a serious inquiry into the words

themselves as well as the images that these words have inspired.

Bonds That Tie: Chemical Heritage and the Rise of Cannabis Research J. N. Campbell, 2020-10-23 This book traces the global chemical history of cannabidiol (CBD), which is a compound that originates partially from hemp (the fiber), marijuana (the popularized term for medicinal/recreational use), and cannabis (the species sativa). It also argues about the position that CBD is in today and the heritage established by chemists over the course of its development. Each term associated with the plant spans centuries of development and cross-culturally became an object of cultivation and commerce. Humans have explored cannabis' complex chemical possibilities with the hope that it would offer pain relief or some type of mind-numbing portal to other existences. As such the trio and their many incarnations have been and will continue to be an integral part of the past, the present, and the future. Known as cannabis compound cannabidiol (CBD), a non-psychoactive component of the drug, it is one of some 100-plus known cannabinoids; offshoots of the original plant that are isolated and, in some cases, chemically altered. Just as with any supposed pharmaceutical marvel, chemists are at the center of this narrative. In order to understand its historical roots, central to CBD's discovery was the efforts of scientists who worked in separate eras and regions. These included, Americans Roger Adams and Allyn Howlett, and the Bulgarian-born Israeli chemist Raphael Mechoulam, along with a throng of others. They influenced a generation of students and changed the face of cannabis research into the 21st century. What does its history tell us about the future of chemical products like CBD? This brief will explore the chemical heritage that formed across a complicated nexus of global events. These are the bonds that tie.
